

TABLE OF CONTENTS

Chapter	Contents	Page.NO
	List of Figures	v
	List of Tables	Ix
	Abbreviations	xi
	Abstract	xiv
1	Introduction	1
	1.1 Objectives	4
	1.2 Organization of the Report	5
2	Literature Review	7
	2.1 Landslide Reviews: International status	7
	2.2 Landslide Reviews: National Status	24
	2.3 Landslide Reviews: Regional Status	36
	2.4 Critical Review	47
	2.4 Research Gap	47
3	Study Area	49
	Physiography (Shimla District)	50
	Economy (Shimla District)	50
	Climate (Shimla District)	51
	Physiography (Mandi District)	51
	Economy (Mandi District)	51
	Climate (Mandi District)	51
	3.1 Study Area 1: Dhalli Landslide (Shimla Tehsil, Himachal Pradesh)	53
	3.1.1 Soil	53
	3.1.2 Geology	53
	3.1.3 Geomorphology	54

3.1.4	Landuse Landcover	54
3.1.5	Land Susceptibility – Dhalli (Rock slide)	61
3.2	Study Area 2: Jhakri Landslide (Rampur Tehsil, Himachal Pradesh)	62
3.2.1	Soil	64
3.2.2	Geology	64
3.2.3	Geomorphology	65
3.2.4	Landuse Landcover	65
3.2.5	Land Susceptibility – Jhakri (Debri Slide)	70
3.3	Study Area 3: Kotropi Landslide – Padhar Tehsil, HP	70
3.3.1	Soil	72
3.3.2	Geology	73
3.3.3	Geomorphology	73
3.3.4	Landuse Landcover	74
3.3.5	Land Susceptibility – Kotropi (Complex slide)	77
3.4	Rainfall Characteristics of the study area	78
3.4.1	Dhalli Study Area	78
3.4.2	Jhakri Study Area	79
3.4.3	Kotropi Study Area	80
4	Research Methodology	82
4.1	Large Scale Mapping	82
4.2	Geological and Geotechnical investigation	84
4.3	Slope stability Assessment and Stabilization Measures	86
4.4	Technology and Techniques used	86
4.5	Data Used	87
5	Large Scale Mapping of the study area	89
5.1	Large scale mapping of the Dhalli landslide through Total Station	89

5.2	Large scale mapping of the Jhakri landslide through Total Station	91
5.3	Large scale mapping of the Kotropi landslide through Total Station	93
6	Geological & Geo-Technical Investigation	96
6.1	Geological and Geo-Technical Investigation of the study areas	96
6.1.1	Stereonet Analysis of Dhalli landslide	96
6.1.2	Field and Lab based Investigation for Jhakri landslide	99
6.1.2.1	Grain Size Analysis	101
6.1.2.2	Atterberg Analysis	103
6.1.2.3	Direct Shear Test Analysis	104
6.1.3	Slope mass rating of Dhalli landslide	106
6.1.4	Point load test of Dhalli landslide	112
6.1.5	Statistical Analysis on frequency of joint sets for Dhalli Landslide	117
6.1.6	Slope mass rating based on field investigation for Jhakri landslide	119
6.1.7	Field and Lab based Investigation of soil samples collected - Dhalli landslide	125
6.1.7.1	Grain Size Analysis	127
6.1.7.2	Atterberg limit Analysis	128
6.1.7.3	Direct Shear Test Analysis	129
6.1.8	Field and Lab based Investigation of soil samples collected - Kotropi landslide	130
6.1.8.1	Grain Size Analysis	131
6.1.8.2	Atterberg limit Analysis	133
6.1.8.3	Direct Shear Test Analysis	134
7	Results & Discussion	136
	Slope stability assessment and stabilization measures	136

7.1	Rock Slope stability assessment and stabilization measures for Dhalli Landslide	136
7.2	LEM based Slope stability assessment and Stabilization measures – Jhakri landslide	138
7.3	LEM based Slope stability assessment and Stabilization measures – Kotropi landslide	141
8	Summary and Conclusion	145
8.1	Findings	146
8.2	Recommendations	148
8.3	Further Research	148
8.4	Research Challenges	149
8.5	Outcome of the Research	150
8.5.1	Papers Published	150
8.5.2	Papers Presented	152
	Reference	153
